PRODUCT FEATURES

- + Amplify and extend RS-232 signals beyond 15.24m (50 ft) limit
- + Daisy-chain multiple repeaters for even extra range
- + Boost lower power RS-232 ports
- + Data rates up to 115.2 kbps
- + Quick, convenient in-line installation
- + Power supply required (not included, sold separately)

OVERVIEW

Model BB-232LB9R is a 9-pin RS-232 repeater that re-transmits all 8 signals and carries the ground line through. Many computers, laptops and desktops feature low-power versions of RS-232 ports that are unable to drive port-powered devices or full-length RS-232 cabling.

Model BB-232LB9R amplifies these weak signals up to the RS-232 Standard for uses such as running port-powered devices (see Figure 1). It is suitable for extending full-powered RS-232 cable runs beyond the typical 15 to 30 meters (50-100 ft) distance. (see Figure 2).

An external power supply is required, not included, sold separately. Model BB-SMi6-12V-P230C1 is recommended.
