

# Smartlee™

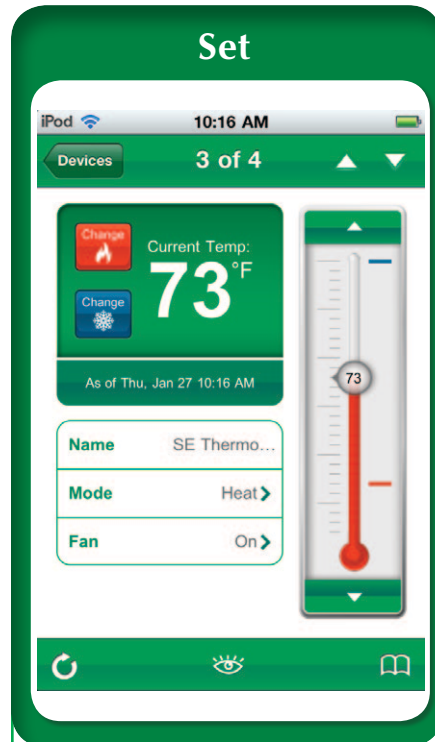

Smartphone app for utility customer engagement.

Smartlee is an online app that gives homeowners the ability to see their water, gas or electricity usage, set control points on thermostats, smart plugs and other Smart Energy devices, and save money by reducing consumption. We call it See, Set, Save™.

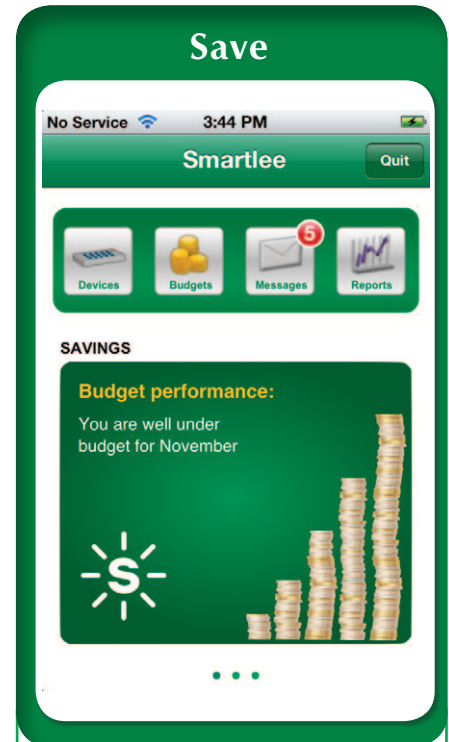

**You can:**

- Generate near real-time reports of monthly, daily or hourly consumption
- Instantly post usage, savings and efficiency tips on Facebook

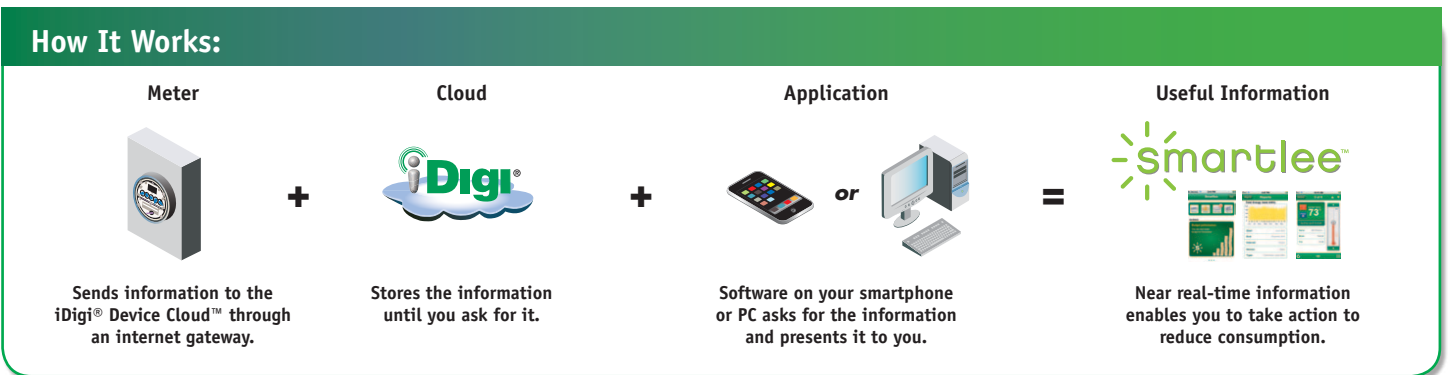

**You can:**

- Set heating and cooling points, control the fan and name multiple thermostats.

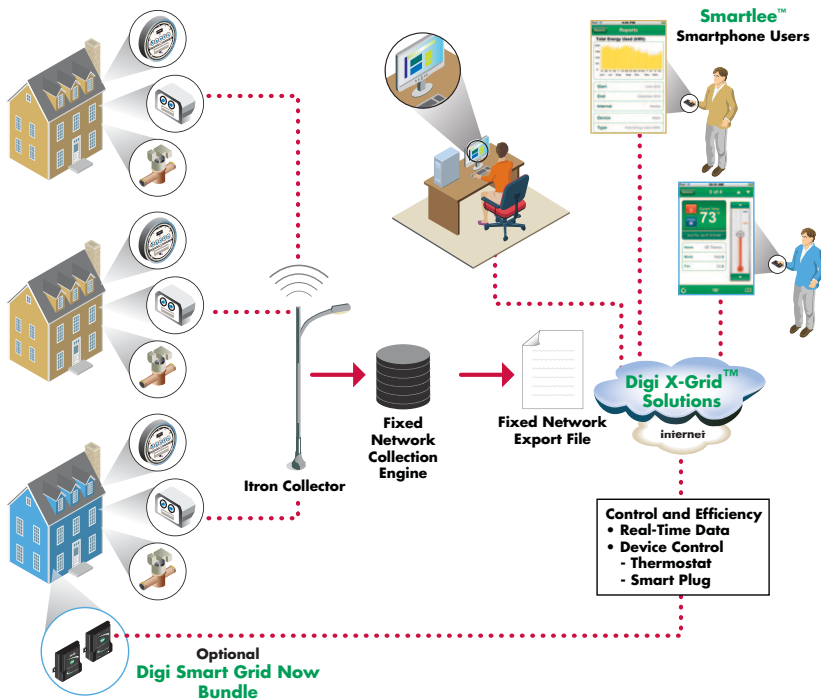

**You can:**

- Establish usage budgets
- Receive updates on performance to budget

## FastPath: Integration with Itron ChoiceConnect™

Smartlee can also interface between the Itron ChoiceConnect™ Fixed Network Collection Engine and the Digi X-Grid™ services platform.

Data captured by the collection engine may be viewed by the customer using the free Smartlee application available in the iTunes Store and Android Market, or by navigating to [www.LiveSmartlee.com](http://www.LiveSmartlee.com).

The homeowner may run reports on consumption that will show hourly, daily or monthly usage based on the configuration of the fixed network system. This information is captured each day, allowing the customer to view information that is within 24 hours of actual usage.

## Powered by Digi X-Grid™ Solutions

The Extended Grid provides a platform where the end users of utility resources can be actively engaged with the utility producers. The utility has the ability to assure grid reliability and shape demand, while the consumer can manage cost while increasing convenience and control.

**Free Applications**  
**Digi Partner Services**

**AMR Meters** (with ERT/Smart Energy Bridge)

**Optional Thermostats**

**AMI Meters** (with ConnectPort® X2 for Smart Energy)

**Digi**

**LiveSmartlee.com** and **Smartlee™** (mobile app)

**Partner Services:**  
 Demand Response: Carrier, comverge, COOPER Power Systems  
 Energy Management Services: ista, Incenergy, CALICO energy services., geo Green Energy Options, EcoFACTOR, comverge
